

How to disable IPV6 in Fedora 12 and CentOS 5.5

Submitted by [Richard](#) [1] on Tue, 07/20/2010 - 23:44

This is a quick tutorial on disabling IPV6 in Fedora 12 and CentOS 5.5

```
echo -e "install ipv6 /bin/true\nblacklist ipv6" > /etc/modprobe.d/blacklist-ipv6.conf
```

Stop ip6tables service and disable it from starting automatically at system boot.

```
service ip6tables stop  
chkconfig ip6tables off
```
